

Social Responsibility of Algorithms

Alexis Tsoukiàs

LAMSADE - CNRS, Université Paris-Dauphine, PSL Research University

25/09/2017 CS INS2I, CNRS

Why?

- Algorithms exist before Computer Science
- Industrial production of software
- Devices with decision autonomy
- Learning increases decision autonomy

What?

- Is mechanism design suitable for algorithm design?
- Can we audit algorithms?
- What the impact would be on formal verification and requirements engineering?
- If we regulate the design and the use of algorithms what the impact will be on economy and society?
